### **EXAMINER'S AMENDMENT**

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Alton Hornsby III on June 13, 2008.

Please incorporate the following amendments into independent claim 13, and cancel dependent claim 14:

13. (Currently amended) A server operational to test a hypertext document for compliance with a selected criterion, comprising:
  - a user interface operational to receive a user selection of the selected criterion and user input of at least one parameter indicative of compliance with the selected criterion for an analysis of the hypertext document, wherein the user selection comprises a user designated limited number of related hypertext documents linked to the hypertext document for retrieval, the related hypertext documents comprising the same primary address as the hypertext document, the primary address comprising an internal address associated with the hypertext document and the related hypertext documents, wherein the user selection further comprises accepting, for the analysis, a user designated limited number of link levels, wherein the link levels comprise a first link

Art Unit: 2176

from the hypertext document to a first one of the related hypertext documents and a second link from the first one of the related hypertext documents to a second one of the related hypertext documents;

~~and~~

a processor component operational to retrieve the hypertext document, to perform the analysis of the hypertext document, to examine the hypertext document to identify links to other hypertext documents, to generate analysis data, to present the analysis data to an application program to correct a definable error, and to store the link information for the hypertext document, and the analysis data, the analysis data comprising an indication of whether the hypertext document is in compliance with the selected criterion; and

a non-volatile memory operational to store the analysis data and the link information for the hypertext document;

wherein the selected criterion involves ~~at least one of the following:-~~

a name change.
